

sand-a-long™

FROM CYCLONAIRE

SANDING IS GOING MOBILE

Filling your locomotives with sand has never been easier, more mobile, or faster with the use of a Sand-A-Long. This sanding conveyor on wheels allows a single operator to fill a locomotive's sanding box anywhere at any time. With the rugged, carbon steel construction, you'll no longer waste time and money on transporting your power to a service platform. The Sand-A-Long brings sand to wherever you are, allowing you to avoid the logistical expense of moving your locomotives to a fixed sand system. Our equipment is designed and built to withstand all weather, avoiding breakdowns, and we guarantee that with a one year warranty.
